**FOR IMMEDIATE RELEASE:****ENABLE-IT KEEPS THE TRAFFIC MOVING FAST AND EFFICIENTLY FOR METRO TEXAS**

LAS VEGAS, NV, August 17th, 2015 --- By Dalia Massri Key Accounts Manager at Enable-IT: PoE & Ethernet Extension Experts.

**Enable-IT Outdoor Weatherproof Gigabit PoE Extenders Keeps the traffic moving fast!**

The North Tarrant Express and LBJ Express Projects in North Texas is the largest and most comprehensive traffic control system built in the USA in the last 20 years and standardized on Enable-IT PoE Extension to support the fully integrated (MLS) Managed lane systems. To keep things flowing quickly and efficiently, the Enable-IT 828W and 828WP solutions provide full IP67 rated protection for Gigabit PoE delivery.

This Kapsch TrafficCom project encompasses delivery of a Toll Collection System (TCS), Intelligent Transportation System (ITS), and Network Communication System (NCS), creating

a fully integrated MLS over more than thirty miles of "managed lanes" – specifically used, administered and tolled lanes to arrange the traffic according to different requirements and demands – with sixty-five toll lanes and thirty-three toll zones.

Kapsch TrafficCom selected Enable-IT PoE Extenders and is a provider of high-performance intelligent transportation systems (ITS) in the application fields of toll collection, urban access management and traffic safety and security. Kapsch TrafficCom covers the entire value creation chain of its customers as a one-stop shop by providing products and components as well as subsystems as open market products, by integrating them into turnkey systems or by developing end-to-end solutions, including services for the technical and commercial operations of systems. Within its current core business of electronic toll collection (ETC), Kapsch TrafficCom designs, builds and operates primarily electronic toll collection systems, in particular for multi-lane free-flow traffic. With 280 references in 41 countries on all five continents and with almost 70 million on-board units delivered and about 18,000 lanes equipped, Kapsch TrafficCom has positioned itself among the internationally recognized suppliers of electronic toll collection worldwide. In North America, the company operates offices in Virginia, Texas, California, Maryland, Pennsylvania, Ontario, and Mexico.

# ETHERNET EXTENSION EXPERTS

The Enable-IT™ 828WP Outdoor IP67 Rated Gigabit PoE Extension Solution is ideal for deploying your outdoor PoE Devices like IP PoE Cameras, PoE Sensors and PoE WiFi Access Points. Enable-IT, Inc. specializes in USA design and USA factory direct manufacture of Extended Ethernet and PoE solutions. Serving US National Security needs, US federal agencies and the commercial sector since 1996.

Security and encryption of your network should be of the highest importance in today's environment where we are flooded with news of Chinese or Russian breaches of our government and business sensitive data. Often times this is accomplished by the hidden spyware in Chinese made cheap network products, so be careful and aware when you think your getting a deal; **Always ask where it's made and by whom!**

**When in doubt ask if their gear is certified secure encrypted!**
