**FOR IMMEDIATE RELEASE:****ENABLE-IT 8955M DEDICATED 8-PORT HIGH POWERED POE EXTENSION DSLAM CONCENTRATOR ANNOUNCED**

LAS VEGAS, NV, February 20th, 2015 --- By Devan Meyers Technical Support Engineer at Enable-IT: Ethernet Extension Experts.

**Meeting the demands for dedicated high powered PoE Extension for deploying security cameras - Enable-IT 8955M PoE Ethernet DSLAM has been upgraded and paired with our 488W 56V DC 8-port rackmount PoE midspan DSLAM.**

The newly designed model also comes with a limited lifetime warranty that surpasses any current manufacturer warranties including our own industry leading 4-year warranty. The EnableIT™ 3600R 8 Port 488W – 56V DC Rackmount PoE Injector is a multi port, long distance driving, high powered PoE Output IEEE 802.3at and 802.3AT certified midspan that delivers up to 61W @56V DC 2A per port.

This high powered 488W 8-port Rackmount PoE Injector is ideal for installing long distance IP PoE devices up to 3,500ft / 1,066m when used with an Enable-IT PoE Ethernet Extender like the 865 PRO or rackmount Multi-port 8955M PoE Extender DSLAM. The 8955M Gigabit Extended PoE DSLAM unit provides a maximum downstream rate up to 260 Mbps to the Enable-IT 870 Gigabit PoE CPE units over 2-pair of telephone or better wiring. An ideal solution for those seeking to run high power PoE and high speed Ethernet communications at extreme distances without the use of expensive fiber transceivers, special wiring or additional power outlets.

**These units have built in encryption to protect the link between the units and most importantly your digital contents from foreign competitive interests that have show up in our copycat clone competitors equipment – some of which have been banned in the USA.**

The Enable-IT 8955M is Ideal for providing Internet access to multi-unit properties like Hotels, outdoor camps, Office complexes, Apartments, Campus Dormitories, Ski Resorts, Stadiums, Shopping Malls Trailer parks, Marinas and Cruise Ships.
