FOR IMMEDIATE RELEASE:

ENABLE-IT ALWAYS FREE AND HONEST EXPERT CONSULTATIONS AND SUPPORT

LAS VEGAS, NV, July 2nd, 2015 --- By Devan Meyers Technical Support Engineer at Enable-IT: Ethernet Extension Experts.

With over 45 years in Systems Engineering, Network Communications and Telecommunications – The Experts at Enable-IT are the most reliable and honest source for technical support regardless of who's products you use.

We certainly believe our US deigned and Made in the USA offers superior unmatched benefits and our in-house manufacturing and design engineers can get on calls at any time you need to create custom solutions for any challenge you face. However even though we are truly the innovators and creators of Ethernet and PoE extension, we are honest and trustworthy in our opinions and recommendations. We will tell you straight if you can use other products to meet your needs.

Enable-IT, Inc. specializes in USA design and USA factory direct manufacture of Extended Ethernet and PoE solutions. Serving US National Security needs, US federal agencies and the commercial sector since 1996.

No Chinese Spyware watching your LAN for your sensitive Business Secrets.

Security and encryption of your network should be of the highest importance in today's environment where we are flooded with news of Chinese or Russian breaches of our government and business sensitive data. Often times this is accomplished by the hidden spyware in Chinese made cheap network products, so be careful and aware when you think your getting a deal; **Always ask where it's made and by whom!**

When in doubt ask if their gear is certified secure encrypted!
