FOR IMMEDIATE RELEASE:

ENABLE-IT ENHANCES SECURITY FOR THE US TENNIS ASSOCIATION HOSTING THE US OPEN

LAS VEGAS, NV, May 5th, 2015 --- By Dalia Massri Key Accounts Manager at Enable-IT: PoE & Ethernet Extension Experts.

The U.S. Tennis Association and Enable-IT come together to break more world records!

The 2015 U.S. Open commences in its usual residency at the USTA Billie Jean King National Tennis Center in Flushing Meadows–Corona Park, Queens, on Monday, August 31st, and runs for two weeks, coming to a close on Sunday, September 13th, 2015. The 15 days of competition showcases more than 250 of the best players in the world. Many fan favorites will take the court.

The USTA researched and selected the most reliable and secure encrypted video security solutions powered by Enable-IT weather proof PoE ready 828WP, and our 865W PRO kits to ensure the safety of 700,000 fans.

Thanks to USTA's diligence, Women, Men, children, and celebrities from all walks of life can be rest assured that security is valued at all times. Enable-IT's products are all proudly made in the U.S.A. and are used in the highest security US Government networks.

The Enable-IT™ 828WP Outdoor IP67 Rated Gigabit PoE Extension Solution is ideal for deploying your outdoor PoE Devices like IP PoE Cameras, PoE Sensors and PoE WiFi Access Points. Enable-IT, Inc. specializes in USA design and USA factory direct manufacture of Extended Ethernet and PoE solutions. Serving US National Security needs, US federal agencies and the commercial sector since 1996.

Security and encryption of your network should be of the highest importance in today's environment where we are flooded with news of Chinese or Russian breaches of our government and business sensitive data. Often times this is accomplished by the hidden spyware in Chinese made cheap network products, so be careful and aware when you think your getting a deal; **Always ask where it's made and by whom!**

When in doubt ask if their gear is certified secure encrypted!
